Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention. At least twenty-eight species are identified as:

- I. *In 1st embodiment* of the invention of providing a computerized system for facilitating transactions in goods or services is specified in paragraph "16" drawn to purchasing goods and service.
- II. *In 2nd embodiment* of the invention of providing a computerized system for facilitating transactions in goods or services is specified in paragraph "17" drawn to a payment instruction.
- III. *In 3rd embodiment* of the invention of providing a computerized system for facilitating transactions in goods or services is specified in paragraph "18" drawn to negotiation between the seller and the buyer.
- IV. *In 4th embodiment* of the invention of providing a computerized system for facilitating transactions in goods or services is specified in paragraph "19" drawn to fulfilling buyer's obligations.

in goods or services is specified in paragraphs "19" through 42 and are drawn to different species.

The inventions are distinct, each from the other as stated above, because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
